

1) Here is a glass, piece of paper and a coin. By quickly pulling the paper from between the glass and the coin, the coin falls to the bottom of the glass.

---

2) Here is a knife and a potato attached to the tip of it. When the knife is raised and then, with force, struck to the ground, the potato continues its movement and sinks downwards the blade.

---

3) On the left there's a "barrier". On the right there's packet and on top of it a bottle filled with water. When the packet is pulled to the left, it hits the barrier and the bottle continues its movement, flying through the air and landing on the floor.
